

AKÖNA®

SCUBA 2024

RESPONSIBLE PACKAGING

We are continuously working to protect our environment through our Responsible Packaging program, which is tasked with reducing the use of plastics in our product packaging. These are some of the steps we have taken to reduce our plastic use:

- Masks are packaged in protective boxes that can also be used for transport and storage of accessories.
- Boots are now shipped in fabric bags, which can be reused for transport and storage, or as a laundry or shoe bag.
- Gloves are shipped in either recycled carton boxes or mesh bags that can be reused for transport and storage or as an ocean clean-up bag to pick up trash while diving.

Innovative packaging solutions for other products will be introduced in the near future.

--------------------------	---

Compact design

Saltwater safe features

Breathable material

With built in privacy features, keeps things hidden and secure

Lightweight

Built-in features to help protect belongings

Material features water-resistant capabilities

Built-in technology to protect against the wind

Polarized lenses

Provides 100% UVA and UVB light protection

Best suited for warm water conditions

Touch sensitivity allows for interaction with touch screens

Waterproof material to keep water out and items dry

Insulated interior to keep items cool during any condition

Fleece construction with warming properties

Quantum Stretch technology neoprene, has 4-way stretch uses waterbased-glue and is earth-friendly.

Made with durable material to withstand extreme elements

With 50+ SPF protection built into the material to protect from the sun's harmful rays

Inflatable, easy to take on the go, transport, deflate and store

Foam construction

Wood core construction

Comes with a fin package

AQUA-AX water-based glue, earth-friendly.

Best suited for cold water conditions

RPET fabric or Recycled Polyethylene Terephthalate is created with recycled material from plastic water bottles. This process uses **85% less energy**, **65% fewer emissions (50 - 60% less carbon and sulfur dioxide)** and **90% less water**.

PERFECT FOR RENTAL

Items that will fit perfectly into your rental line-up.

2 YEAR LIMITED WARRANTY

This two-year limited warranty helps to cover manufacturer's defects. Available on select items.

PRODUCT VIDEO AVAILABLE

Product knowledge videos are available on our YouTube Channel. These videos are available to consumers, staff and are great informational pieces for our highlighted products. With videos periodically being added, we are continuing to grow our video library. You can find our channel at:

TRADITIONAL ROLLER BAG

This traditional roller bag is super durable and fits all your dive gear and the kitchen sink. There's a spot for everything in this over-engineered bag. Not to mention it includes an AKONA Classic Regulator Bag with purchase.

- Exterior pocket & locking D-ring
- Heavy-duty bronze #10 zipper, slider & pull.
- 2 interior compression straps to secure gear.
- 2 exterior fin pockets fit two separate pairs of fins.
- Exterior mesh water bottle pocket
- Includes reusable protective luggage sleeve for travel
- Durable smooth-rolling wheels
- 31" X 21" X 14" / 79 x 53 x 39 cm
- Weighs 14 lbs. / 6.3 kg
- Heavy-duty YKK zippers
- Volume: 149 Liters

* AKP147-WS Replacement Wheel Set

TERRAPIN

AKB547

HARD SHELL ROLLER SUITCASE

A hard shell case made from an ABS/PC blend that is durable, providing tremendous protection while weighing just 10 lbs., 2oz. With four 360° rotating wheels the Terrapin is a huge step up from other luggage. With weight distributed over four wheels, it lessens the load on each axle. It also makes navigating in the airport dramatically easier.

The size of the bag is ideal for transporting dive equipment. At 31" long, carrying an entire set of equipment (cold or warm water) is not a concern.

- Saltwater resistant coil zipper
- Replaceable wheels
- 31" X 14" X 14" / 79 x 36 x 36 cm
- ABS/PC blend
- Weight: 10 lbs., 2oz / 4.5 kg
- Hard outer shell to protect gear
- Volume: 100 Liters
- Retractable handle

* ARW03-1 RT Rear / LT Front * ARW03-2 RT Front / LT Rear

- Now made with Recycled Fabric
- Reinforced wrap-around handles
- Heavy-duty YKK#5 zipper
- 12" X 6" X 6" / 30 x 15 x 15 cm
- Compact storage for heavy items
- Volume: 7 Liters

AKONA WETSUITS

Our high-quality, eco-conscious wetsuits are designed to provide maximum warmth, comfort and flexibility. Designed to make you look and feel great in and out of the water. Finishing touches like protective “bullet-proof” knee pads, reinforced pull-loops, glide skin extremity seals and the proven water-seal zipper closures.

Whether diving in warm tropical waters, paddleboarding in fall, snorkeling in the Caribbean, or winter diving in colder temperatures, we know you'll find an AKONA suit to fit your adventure. Offered in a wide range of sizes and styles for activities above and below the water.

EARTH FRIENDLY NEOPRENE

AKONA understands the importance of reducing our dependence on oil-derived chemicals. Our earth-friendly neoprene uses limestone that is over 99.7% calcium and does not rely on oil as extensively as petroleum-based neoprene.

STRETCH**

QUANTUM STRETCH

The unique characteristics of the nylon weave combined with the super lightweight neoprene rubber allows our Quantum Stretch suits extraordinary flexibility and stretch capabilities; resulting in a great fit. Through years of research and engineering, our neoprene experts have developed a four-way stretch nylon weave capable of withstanding the harsh elements of diving. The closely guarded, unique lamination process and a strategically designed pattern matched with lightweight, limestone based neoprene is the science behind AKONA Quantum Stretch wetsuits.

 D **AFS-60M-BK** 60M (197FT) ALUMINUM SPOOL – BLACK

Each Spool Includes a double-ended stainless-steel clip – Corrosion resistant, easy to attach to spool in any conditions

SPOOLS

Dive spools are an essential item when exploring wrecks, caverns/caves, search and recovery, or releasing a delayed SMB. Spools are a diver's safety line. Spools and lines are a tried and true way for divers to return to their starting point. Simply anchor your line to a point just outside the cave opening or at the entrance point of the wreck and unroll your line from the spool as you progress through the dive. When it is time to exit the cave or wreck, turn around and slowly wind the line back onto the spool until you've exited the cave/wreck. Wreck divers are encouraged to tie off their lines to anchor points inside the wreck to avoid tangling the line on any debris within the wreck.

- A **DFS-20M** 20M (66FT) ABS SPOOL WITH LINE MARKER LOCK
 B **DFS-15M** 15M (49FT) DELRIN SPOOL
 C **DFS-30M** 30M (98FT) NYLON-FIBER SPOOL

Each Spool Includes a double-ended stainless-steel clip – Corrosion resistant, easy to attach to spool in any conditions

NITROX

NEW
