ICON

SM3500

The Icon mask offers a range of attractive features. Low profile and reduced drag are just the beginning. The Icon is designed with a medium width skirt, so in conjunction with the low profile nature, this mask fits where other masks just can't. The textured skirt also offers some additional styling and comfort above and beyond the typical polished skirt.

- Low Profile mask sits up close to the divers eyes, providing outstanding field of vision
- Two tear drop shaped lenses allow significant increased vertical vision
- Crystal silicone double feather-edged skirt
- Swivel buckles provide ease of use and service
- Upgrade to the Genesis Elastic Mask Strap

* MC-9 Replacement insert buckle
 * MC-11 Replacement receiving buckle

MATCHING STEALTH SNORKEL ON PAGE 15

STEALTH

SM1400

We have stepped up our freediving game with the Stealth mask. The skirt was carefully designed with Low Volume and Ergonomics at the forefront of the design. The low volume mask and reinforced silicone nose bridge were specifically created to compensate for the squeeze you put yourself and your mask under when diving deep.

- Reinforced silicone nose bridge provides lateral stability to a frameless mask
- Low Profile mask sits up close to the divers eyes, providing outstanding field of vision
- Swivel buckles provide ease of use and service
- Double lens frameless mask
- Modern Styling and Design

* MC-9 Replacement insert buckle

CORONADO

PF62x0xx

You won't find a better kicking fin for the price than the Coronado from Genesis. These traditional blade style fins kick extraordinarily well, and with an ample foot pocket. They fit a wide variety of boots. This entry level fin is light weight and won't weigh down your luggage when traveling. You really can't beat the Coronado if you are budget-minded.

- Open heel design for use with dive boots
- Lightweight durable blade - optimized length to width for scuba application
- Flex limit feature allows blade to be easily shaped during kick for correct position to generate thrust
- Quick release buckle and adjustable strap

SCUBALAB TESTERS CHOICE

2 0 2 0

"The Prana is based on the long-serving GS2000, with a clear family resemblance. But while the chunky, balanced-piston first stage and top-mounted Venturi control are still there, the Prana has benefited from the makeover. The breathing adjustment is more ergonomic and the reg's look has been freshened from the Y2K-era feel of its predecessor. And the Prana has the same smooth breathing and lightweight comfort that we liked in the GS2000. Test divers rated it very good in all positions for ease of breathing and dry performance. Its compact profile and near-neutral feel in the water tied top score in its category for overall comfort. "So small and light," said one tester. Test divers also selected it as their favorite in its category. The Prana is our Testers Choice for regs under \$500 USD."

- ScubaLab Tester's Choice

PRANA

REGULATOR & OCTO

GR910 (Regulator) & GS010 (Octo)

Steeped in tradition of the GS2000, the Prana Regulator delivers on the expectations around the world for breathing performance, durability, longevity, and styling. This top performing regulator is designed to perform in a wide variety of extreme conditions. The dry environmentally sealed flow by piston 1st stage with the patented Dry Air Demand (DAD) will perform consistently regardless of depth or tank pressure. The fine tune breathing resistance 2nd stage, combined with an extremely reliable 1st stage, will deliver a smooth breathing experience regardless of diver's breathing demand.

FIRST STAGE

- Spring chamber is environmentally sealed to maintain cleanliness, reducing the effects of corrosion and contamination. This contributes to uniform high performance as the regulator is used.
- Balanced flow by piston delivers ample air volume at stable intermediate pressure to the second stage over a wide range of supply pressures.
- First stage uses no liquids or gels that can leak or add to service costs.
- Tee-shaped design reduces regulator profile when mounted on tank.
- Four LP ports and two HP ports for more options and ideal hose positioning.
- Nitrox compatible up to 40%
- DAD Dry Air Demand - Internal pneumatic depth compensation mechanism

SECOND STAGE

- Diver Adjustable Breathing Effort Control Knob.
- Injection molded thermoplastic rubber seat is harder than silicone seats and maintains its shape and does not coin as deeply.
- Diver operated Venturi Switch.
- Free Parts for Life (Restrictions Apply)

This regulator is suitable for water temperature warmer than 50°F (10°C).

SERVICE KITS:

1st & 2nd - PK910

GRAVITON

DIVE COMPUTER

GCC-02

The Genesis Graviton takes all the best features of the Centauri and adds a beautiful color screen. This new Genesis watch/diving computer provides a high-resolution color display using a MIP (Memory In Pixel) LCD screen for clarity and brightness. This full featured dive computer features Scuba, Free Dive, and Nitrox modes. With five buttons, navigation is intuitive and simple, making the Graviton one of the easiest computers to use. The MIP (Memory In Pixel) color screen provides contrast, allowing you to find the information you need immediately. Every setting is adjustable to optimize your diving experience. All in an easy to view and navigate system. Like the Centauri the Graviton utilizes the Buhlmann ZHL-16C algorithm.

Color Wrist Band Options
GCC-WB-XX
Color options (BK, BU, LY, MG & TL)

*GCC-CS Charge Clip and Cable
*GWC-LP Lens Protector

Scuba, free dive, and watch mode

Maximum operating depth: 100m/328ft

Rechargeable battery

Nitrox support up to 99%

Backlight screen

Resettable settings

SPECIFICATIONS

- Memory In Pixel (MIP) Color LCD
- High Resolution Display
- GPS Connectivity
- Lightweight Wrist-Mount Dive Computer
- Simple Function Navigation

FEATURES

- Twist To Next (Compass & Nitrogen Loading)
- Buhlmann ZHL-16C Algorithm
- Diver Log
- Dive Story App
- Smart Phone Wireless Sync
- Long Battery Life
- Audible Alarm
- Vibration Alarm
- User Log Clear
- Digital Compass

SCUBA MODE

- Automatic dive timer
- 3 Conservative Factor levels:
CF1 (most conservative)
CF2 (conservative)
CF3 (least conservative)
- Set Gas (O2% and PO2)
- Depth and Time Alarm
- Sample Rate Adjustment
- NDL Display
- Ascent Rate Alarm
- Deco Stop
- G-Sensor
- No Dive Warning
- No Fly Warning

FREE DIVE MODE

- Timer
- Current Depth
- Temperature
- Depth and Time Alarm
- Surface Interval Alarm
- Max Depth

WATCH MODE

- 12/24 HR
- Date and Date
- Language
(English, Spanish, Chinese)
- Backlight Brightness

GAUGE MODE

- Depth
- AVG Depth
- Stopwatch
- Dive Time
- Surface Interval
- Temperature

PLAN MODE

- O2%
- Conservative Factor
- Depth

GRAVITON

CENTAURI

DIVE COMPUTER

GWC-01

The Genesis Centauri Dive wrist mount computer is fully capable of managing all your diving needs. Whether you are scuba diving, free diving or nitrox trained, the Bühlmann ZHL-16C algorithm will help guide you to manage all of your diving needs. Every setting is available to customize, in order to have this dive computer work the best for you. Plus, it is stylish enough to wear every day.

Scuba, free dive, and watch mode

Maximum operating depth: 100m/328ft

Rechargeable battery

Nitrox support up to 56%

- Stop watch
- Dive time
- Water Temp

LOG MODE

- OC for Scuba
- GA for Gauge
- F for Free Dive

“The watch-size Centauri’s screen is just 1.1 inches in diameter, but easy to read thanks to its segmented, clearly marked display and glowing illumination, which stays on during a dive and has five power levels. Test divers rated it very good for readability at depth and on the surface (although bright sun did tend to wash it out). Testers also liked the menu navigation, which identifies the function at play and shows its current setting. That helps even a new diver keep track of where they are in the menus, which are long but logically organized. Part of the reason for the long menu is the Centauri offers a fair amount of adjustment, including a choice of standard six-field dive display or a simplified three-field view. The attention-getting vibration function works nicely with the computer’s crystal-clear deco and safety-stop displays, which have a prominent timer and “CLEAR” alert when completed. “Excellent safety stop,” noted one tester, and others agreed, giving it the top score in the test. Capable and easy to use, attractively priced and selected among the favorites of test divers, the Centauri is our Best Buy.”

- ScubaLab

GWC-WB-XX

Add your favorite color or match your Centauri to your other dive gear. These 100% silicone wristbands are comfortable and long lasting.

- Wristband can be used on any wrist computer or watch with 21mm band / housing connection
- Durable coated metal buckle
- Quick and easy to swap to your favorite color.

A

PRESSURE GAUGE

PG2229

The new Genesis Pressure gauge comes standard with dual scale (PSI/BAR). Up to 5000 PSI/350 BAR. Enclosed in a small diameter case, helping to reduce bulk and weight. Easy to read numbers and color scale with glow in the dark background. Available as a single pressure gauge with console and hose or single pressure gauge for replacement. 1.75" diameter.

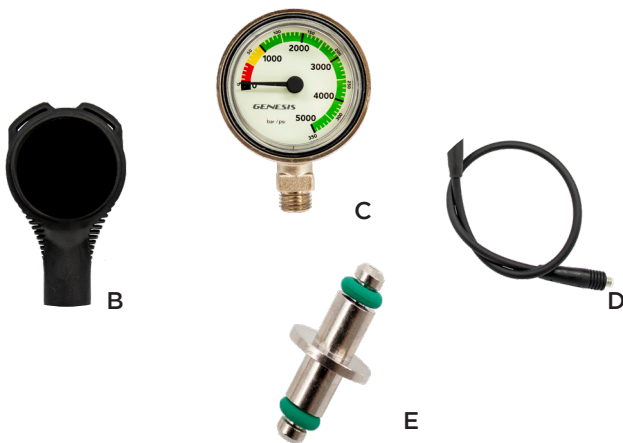

A

PRESSURE & COMPASS

GAC-04

The new Genesis Pressure & Compass gauge comes standard with dual scale (PSI/BAR). Up to 5000 PSI/350 BAR. Enclosed in a small diameter case, helping to reduce bulk and weight. Easy to read numbers and color scale with glow in the dark background. 1.75" diameter.

An underwater photograph of a shipwreck. The ship is heavily rusted and partially submerged. Two divers are visible: one is positioned near the upper part of the ship's superstructure, and the other is further to the right, swimming horizontally. Bubbles from the divers' breathing apparatus rise towards the surface. The water is somewhat murky, and the seabed is visible at the bottom.
